VITAMINE C

1000 mg TR
60 tabletten - 60 g

VOEDINGSSUPPLEMENT

VITAMINE B12

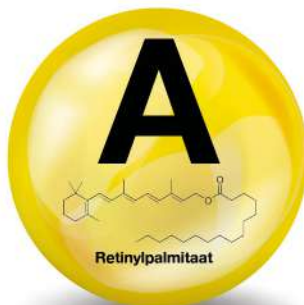

The chemical structure shows a central nucleoside core. The base is a purine derivative with an amino group at the 6-position. The sugar is a ribose derivative with a phosphate group at the 5-position. The phosphate group is linked to a pyridine ring via an ester bond. The pyridine ring has a methyl group at the 2-position and a hydroxyl group at the 3-position. The entire molecule is shown in a detailed, ball-and-stick-like representation with various labels for atoms and functional groups.
